

10 Year Summary									
1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
112,009	105,593	103,996	97,589	101,942	99,182	98,860	97,008	98,754	96,695

	Q1	Q2	Q3	Q4	Average
2001	96,292	97,503	97,898	95,087	96,695
2002	97,628				97,628

There were 97,628 bookings this quarter. This number represents an increase of about 1,300 bookings per month when compared with the 1st Quarter of 2001. While this might represent the beginning of the return to increasing jail populations, we must proceed with caution in making such an interpretation. The number of bookings fluctuates more than many of the other Jail Profile Survey variables. For example, in the year 2000, one quarter had an average of over 101,000 bookings per month, while another had an average of only 93,000 bookings per month. Time will tell if this quarter's increase is a harbinger of future increases in the ADP.
